Backend Developer – Final Year Internship | 42 School Program

Currently completing the 42 school curriculum, I am building a SaaS solution for healthcare professionals with the goal of delivering simple and effective tools tailored to real business needs. I am looking for a challenging technical internship where autonomy, precision, and team collaboration are valued.

PROFESSIONAL EXPERIENCE

Founder & CTO
Health Saas solution - Niels (www.tryniels.fr)

- Building an intelligent writing assistant for neuropsychologists (target : 5k users)
  - Clarify the business needs and expectations of therapists
  - Set up a simple, intuitive interface for uploading and retrieving business documents (HTML, CSS, React, NextJS)
  - Model fine-tunning with the data collected (Python, Ollama, Hugging Face)
- Co-construction of the tool with healthcare professionals - active listening, respect for the therapeutic framework, attention to confidentiality issues

Senior Consultant
ISLEAN - Paris | 2 years 6 months

- Deployment of a RPA tool for interim management (1500 temporary workers)
  - Manage a payroll automation tool (SAP IRPA + JS)
  - Define tool specs
  - Design and write user documentation
  - Coordinate sprints with external developers
  - Report to the customer and internally
- Support La Poste in the national roll-out of a new B2B offer
  - Formalization of a 5-year vision and its operational implementation
  - Stakeholder outreach (sponsors, partners, local teams, etc.)

Co-founder - Sales & Partnerships Director
Les Gamins Gourmands - Montreal | 3 years

Montreal-based confectionery start-up, distributed to delicatessens, events and companies
- Develop distribution strategy (grocery stores, online sales, events, corporate, etc.)
- Manage the transformation of our B2C model to a B2B model (overhaul of the offering, internal optimization, review of tools)
- Produce dashboards and analyze sales data
- Conduct market and competitive positioning studies
